Technical drawing of a beam cross-section. The width is dimensioned as 1200mm. The section shows a rectangular concrete beam with a central vertical axis. Reinforcement is shown as horizontal bars within the beam. The top reinforcement consists of three bars, with the central bar labeled '6E' and the side bars labeled '6E'. The bottom reinforcement consists of three bars, with the central bar labeled '6E' and the side bars labeled '6E'. The beam is supported by a base, indicated by a hatched area below the beam. The drawing is a cross-section, showing the internal structure of the beam.
