Mac Benchmarks

Welcome to the Geekbench Mac Benchmark Chart. The data on this chart is calculated from [Geekbench 4](#) results users have uploaded to the [Geekbench Browser](#). To make sure the results accurately reflect the average performance of each Mac, the chart only includes Macs with at least five unique results in the Geekbench Browser.

[Geekbench 4](#) scores are calibrated against a baseline score of 4000 (which is the score of an Intel Core i7-6600U). Higher scores are better, with double the score indicating double the performance.

Curious how your Mac (or PC) compares? [Download Geekbench 4](#) and find out how your computer measures up to the Macs on this chart.

This chart was last updated about 3 hours ago.
